

Drone over the scene

1. If people are in danger, call 911 first. The aircraft is secondary.
2. Clock from your position. Height guess. Heading. What is under it — people, apparatus, LZ, power, none.
3. Last visual: “I see” or “I don’t.” Time it. Do not freeze a last plot as live.
4. Do not chase. Do not launch at it. Dark Sky Systems LLC is not a licensed security company.
5. Write: time first seen, last heading, photos if you can without leaving the job, Remote ID number if a display shows one.
6. One sentence to command: drone over [side], heading [], over [people / apparatus / none], 911 [called / not].

Must not: jam, spoof, or claim the sky is empty. Silence on radios is not an empty sky. This is observation paper for this run.

What you write

1. Incident / run number: _____ Date: _____ Time
first seen: _____
2. Your position (street, hydrant, apparatus):

3. Clock / heading / height guess:

4. Under it: people · apparatus · LZ · power · none · other:

5. Photo taken? Y / N From where you already stood? Y / N
6. Remote ID number if a display showed one:

7. Who you told (command / 911 / other):

**This is observation paper for this run. If people are in danger, call 911 first.
Silence on radios is not an empty sky.**
