

How this file sits with the Emergency Action Plan

OSHA requires a written emergency action plan for most workplaces. General industry is 29 CFR 1910.38. Construction is 29 CFR 1926.35. The employer writes and keeps that plan. This pack is the observation file operations and first-in companies keep *with* it: what the ground actually looks like, dated, with still numbers.

What 1910.38(c) and 1926.35 ask you to be able to show

Reporting a fire or other emergency. Evacuation and exit-route assignments. Accounting for people after evacuation. Rescue and medical duties. Names or titles of people who can explain the plan. Floor plans or workplace maps of escape routes (Subpart E appendix).

This pack gives you rows and stills for those facts. It does not replace the plan. It does not inspect, certify, or stamp.

How first-in uses it

Engine and medic companies size up from the stills: gates, pinch, the hole, confined entry, ambulance in, patient out. Fill what you see. Empty cells mean you have not looked yet.

PROPERTY / JOB		DATE OF STILLS	
EMPLOYER / GC		PLAN KEEPER (NAME / TITLE)	
ADDRESS			
STILLS FOLDER			

Reporting emergencies — 1910.38(c)(1) · 1926.35(b)(1)

HOW AN EMPLOYEE REPORTS	
INTERNAL NUMBER / RADIO	
911 / PSAP NOTE	
WHO IS TOLD AFTER 911	

Exit routes and assembly

ROUTE / GATE	WHO USES IT	STILL #	NOTE (PINCH, LOCK, CROWD)

Accounting after evacuation

ASSEMBLY LOCATION		STILL #	
WHO TAKES THE COUNT		WHO IS OFTEN NOT AT GRADE	
ROOF / HOLE / VAULT NAMES			

Medical, patient-out, first-in path

ITEM	Y / N / NOTE	STILL #
Ambulance in path (service road, gate, pinch)		
Patient-out path		
LZ if marked		
Clinic / hospital in near proximity (name)		
On-site first aid / AED location		
First-in apparatus path from the public road		
Hydrant / FDC if in the stills		

Excavation, confined space, fall, notes

OBSERVATION	WHAT THE STILLS / WALK SHOW	STILL #
Excavation / trench (ladder, box, lip, spoil)		
Confined space (limited entry, vent, retrieval — describe, do not classify)		
Open hole / roof / fall		
Other (fuel, glass, RF, weather in the still)		

Limits

Observation file for operations use with the employer’s Emergency Action Plan (29 CFR 1910.38 / 1926.35). Not an OSHA inspection. Not a PE stamp. Not a confined-space permit. Not a fire-code plan review. Dark Sky Systems LLC does not write the employer’s plan.
